REWARD

First two customers to report tips leading to a positive identification of persons participating in an unauthorized connection to or unauthorized use of the District water system will receive \$100.00 each. This reward shall only apply to unauthorized use/ connection of 1" and larger meters and fire hydrants. Only persons who have not participated in the unauthorized use may claim a reward.

Exceptions: First two customers may not be related. Employees of Cedar River Water and Sewer District and their family members are not eligible for reward.

The fees listed in this document will supersede all previous rate schedules and resolutions. This will serve as the master list for all fees and penalties charged by the District. This list may be amended, in whole or in part, without notice by resolution of the Board of Commissioners.

FOOTNOTES

¹ Such charges shall be automatically increased annually by rate of interest charged to ULID No. 23 assessments. (Interest has accrued for 10 years, no further interest to accrue.)

² The acreage charge only applies to single family residential development in non-urban areas (the front footage charge applies otherwise); a minimum charge of 3 acres shall apply; all acreage up to a maximum of five acres shall be charged for one single family residence; remaining acreage in five acre increments shall be charged for each additional ADU or ERU; all previously uncharged acreage shall be charged upon subdivision or non-single family residential development of the parcel; acreage charges generally do not apply when owners install on-site mains pursuant to District's developer extension standards.

³ A minimum charge of 75 front feet for water and 100 front feet for sewer shall apply; front footage is measured by the footage that a main traverses a parcel; front footage charges apply to all development except when acreage charges apply.

⁴ Number of ERU charges to be determined by estimated water use if available, by using the formula that 1 ERU = 80,300 gallons of water per year. If estimated water use not available then the Meter Size / ERU Equivalent Chart on Page 8 will be used.

⁵ To be increased by 5.0% interest annually for a period of 10 years. (Interest has accrued for 10 years, no further interest to accrue.)

⁷ See Res. 06-66; this charge includes connection and meter fees for one Grant Eligible Accessory Dwelling Unit to an existing Dorre don Community residence already connected to the District water supply. Property owners not paying this charge in full by September 30, 2006, shall be subject to Column B water rate surcharges as set forth below for Dorre Don connections. Such surcharges shall be applied to the \$715.75 amount based on 5% interest. The owners may pay the entire amortized balance at any time.

⁸ ERUs attributable to Commercial Property shall be determined by dividing the total number of square feet of improvements by 2,000. Fractions shall be rounded up to the next whole number.

⁹ Acreage and Front Footage charges as stated above will apply unless the District has specifically adopted another unit of measurement for a project specific charge.

¹⁰ These rates are based on the regular water rates plus surcharges adopted by resolution #4201. These rates only apply to the Webster Lake Communities as defined in said resolution.

¹² This charge applies to all parcels shown on the map attached to Resolution 07-19. To be increased by 5.0% interest annually for a period of 10 years. (Interest has accrued for 10 years, no further interest to accrue.)

¹³ To be increased by 5.0% interest annually for a period of 10 years (Interest has accrued for 10 years, no further interest to accrue.)

¹⁴ Rate subject to change based upon District policy manual and most recent Bond issues. See Section 6.15 of the District's Policy Manual. When other interest rates have been adopted for specific situations, those rates shall apply.

¹⁵ To be increased by 5.0% interest annually for a period of 10 years (Interest has accrued for 10 years, no further interest to accrue.)

¹⁶ Fee for scanning documents requested through public records request. Fee will apply if 10 or more pages are scanned.

¹⁷ Rate may not exceed maximum of prime plus 4% as stated in RCW 57.08.081(3).

¹⁸ To be increased by 4.0% interest annually for a period of 10 years. Payment calculations for deferred connections are attached as Schedule 6.

¹⁹ When the Board of Commissioners approves an account to be assigned to an attorney to begin the foreclosure process, costs and fees billed by the attorney shall be added to the customer account as incurred. The foreclosure process may include steps by the attorney to analyze, research the condition of title and settle the account prior to actually filing with the court. These costs are still considered part of the foreclosure process.

²⁰ Credit card payments will be charged the administrative fee charged by the processor (currently \$2.95 per transaction).

²¹ Common areas used by tenants and staff are considered an extension of the living units and are therefore included in the per unit connection charge. Commercial and/or retail areas open to the general public are subject to commercial/non-residential connection charges.

²² Multi-Family is defined as Apartments, Condominiums, Townhomes, Duplexes, Multiplexes and Assisted Living Facilities.

²³ ADU's constructed after October 1, 2019, if separately chargeable per District policy, will be charged a General Facilities Charge equal to 50% of one ERU. For ADU's constructed prior to October 1, 2019, that have not previously paid a General Facilities Charge, the District will assess the General Facilities Charge applicable at the time of the ADU's construction.
